To: Jon Brodziak - NOAA Federal <jon.brodziak@noaa.gov>

Hi Jon,

I don't know if anyone has shared the news with you yet, but WCPFC did adopt the new CMM for WCNPO striped marlin at the Commission meeting this week. They ended up using the 2000-2003 baseline from the previous CMM instead of the 2018-2020 baseline we proposed, but I'm glad they were able to come to an agreement. They have asked the BILLWG to provide the rebuilding runs using the catch allocations they adopted to make sure it will reach the rebuilding target on schedule, but I don't expect that to be a heavy lift.

Michelle
